Protective equipment for cryogenic operatives

Face Shield

- THIS PRODUCT IS APPROVED TO
BS EN 166, STANDARD
- EC CERTIFICATE NUMBER 1215,
ISSUED BY INSPEC
INTERNATIONAL LTD.

High quality Bionic face shield complete with top of head protection and has a built in chin guard for ultimate protection. The visor is constructed from a translucent polycarbonate material, which offers protection against liquid droplets and vapours, and is the strongest material for impact resistance, but is also lightweight.

This face shield has a fully adjustable headband and contains a locking mechanism for complete safety. Though it has many adjustable features, this face shield gives a most comfortable fit.

This face shield and visor gives an unrestricted field of vision, whilst providing facial protection.

Polycarbonate visors are not suitable for use with all chemicals – if you are unsure contact your supplier for advice.

Visors should be inspected before each use to ensure that they are not damaged; any defective visor should be discarded and replaced. They can be cleaned using warm soap and water, the use of harsh abrasives is not recommended.

In use, ensure that the face shield fits comfortably and securely on the head. Protection will only be offered if the face shield is fitted correctly.

Ensure that the visor is in place before entering the hazard area.

The face shield should be stored out of direct sunlight, away from chemicals and not exposed to extremes of temperature.

Part No: 220300
